## Software Engineer

**Passionate Frontend Developer with ~4 years of experience**, skilled in building scalable and performant web applications using **React, JavaScript (ES6+), HTML, CSS**, and modern UI libraries. Proven track record of delivering intuitive user experiences, optimizing UI performance, and taking ownership of end-to-end frontend features across responsive and accessible applications.

## WORK EXPERIENCE

### Reyna Solutions - Software Engineer | May'2023 - Present

- Took **ownership** of complex UI modules for medical platforms, using **React, Redux/Redux Toolkit, and Ant Design**. Delivered features like **role-based access, chat, calendar, video calling, and QR-based case sharing**. Integrated REST APIs and optimised UI performance by ~30% via **lazy loading** and **efficient rendering**.
- Built and integrated **200+** frontend screens, some even before final Figma designs – demonstrating speed, initiative, and alignment with UX goals.
- Developed a dynamic **form builder, signature capture, and annotation tools** using **JavaScript** and **Canvas API**, improving interactivity in medical documentation flows.
- Implemented a multi-step **authentication** flow, integrated **audio/video recording in worksheets**, and implemented a shape-drawing text editor using **React** and **Material UI**, boosting student-teacher engagement in an EdTech platform.
- Led frontend design and **owned** architecture setup for a **React-based CRM**, integrating **Google Maps, Kanban board**, and dashboards. Reduced UI build time by 40% with reusable components and structured development.
- Implemented **server-side rendering (SSR)** in a React app to boost **SEO** performance.

### ITechnosol Inc. - Junior Software Engineer | May'22 - May'23

- Developed and maintained real estate web portals using **React, Material UI, and Tailwind CSS**. Built reusable modules (Estates, Residents, Guards) and integrated **CRUD APIs** using **Axios**.
- Migrated a logistics platform from **Angular to React**, implementing modules like Orders, Dispatches, and Leads. Enabled bulk data operations with **Excel import/export**.
- Contributed to a navy education portal by developing modules like App Users, eBooks, and Notifications using **React** and implemented a **push notification system** for real-time updates.

### Geo Design & Research Pvt. Ltd. - Graduate Engineer Trainee | Mar'21 - Nov'21

- Built form modules using **React Hook Form & Yup** with file attachment support and validation.

## INDEPENDENT PROJECTS

### React Kanbanify - [react-kanbanify](https://react-kanbanify.vercel.app)

- Published a reusable and customisable Kanban board as an open source **npm package** using **React**.

### Portfolio website - [shrey-thakkar.vercel.app](https://shrey-thakkar.vercel.app)

- Built and deployed a personal portfolio using **React**, hosted on Vercel for seamless project showcasing.

## SKILLS

**Languages:** HTML, CSS, JavaScript, TypeScript, Python & NodeJS (basic)

**Libraries & Frameworks:** React, Redux-Toolkit, Ant-Design, Material UI, Tailwind CSS, i18n, Jest

**Tools & Technologies:** REST APIs, GraphQL, Git, Docker, CI/CD using GitHub actions

**Build Tools & Supporting Technologies:** Webpack, Vite, Parcel, Rollup, ESLint, Prettier, Lint Staged, Husky

## EDUCATION

**GCET | B.E (Bachelors of Electrical Engineering), 2017 - 2020, 7.15 CGPA**
